

## Topics for "Electrical Test"

1. Your electrical test must have **8** questions. Before you can begin to build your circuits you need to complete your research.
2. The topics and page numbers are listed below. You must read and take notes from your text.
3. Take notes in outline form.
4. Bring your notes to class.
5. Your notes must be finished before you can begin to build your circuits.

Topic	Page numbers	Number of questions to create
Electric charge	166-167	1
Electric current	168	1
Resistance	168-169	1
Series and parallel circuits	170	1
Electrical Safety	171	1
Magnetic forces	172-173	1
The Earth as a magnet	174	1
Electromagnets	176-177	1
