

Portfolio Reflection

Task: After completing each aspect of the portfolio, students should reflect on and review the quality of their work. Answer the following questions completely.

1. What portfolio assignments did you enjoy the most? Why?

2. What portfolio assignments (or portions of particular assignments) did you enjoy the least? Why?

3. Identify one piece of work that you would consider to be your best work. Explain why you selected this piece. Please do not base your decision on the grade you earned.

4. What could you have done to improve your portfolio work?

5. In addition to the individual grades on each portion of your portfolio, students will receive a grade on their effort. The criteria used to assess student effort will include the **appearance** of your final product, the **neatness** of all work in your portfolio, the **punctuality** of the portfolio assignments, the **organization** of the portfolio components, and the **time spent** on each aspect of the portfolio. If you had to grade yourself, what grade would you receive? Why?
