

Name #
Science/Safety Shield Project Evaluation

Date:
HR:

Directions: Look over the seven questions we will use to evaluate the Safety Shield Cooperative Group Project.

Reinforce this sheet; it will be placed in the "Notes" section of your binder. (Make sure you complete the information in the header).

Procedure: Your partner(s) are: _____

Your assigned marker color is: _____

You will begin at station number _____

When directed, move to that station, read the question and write one or two responses in your assigned color (fine point marker, only).

You will rotate when you hear the

Here are the questions:

- 1) How do you think the finished shields look? Include positives and negatives - but don't focus on any specific shield.
- 2) Discuss the way all classes worked together to present safety guidelines.
- 3) What were the easiest and most challenging parts of working with a group to complete your task?
- 4) Refer to question #3. What suggestions do you have for improving any part of this project?
- 5) Look at the rules for cooperative group work. After working together are there new rules you would create or accentuate?
- 6) What was the most enjoyable part of the Safety Shield Project?
- 7) Did the use of the frogs assist your group in reflective listening? Explain.
