

**Study Guide**  
**Unit A, Chapter 1 Test**  
**Test Date: 12/12**  
**Test Format: Multiple Choice**  
**Number of Questions: 40**

**I. Organizing your efforts:**

- A. Create an outline of each section of the chapter – look for major points**
- B. Create a practice test for yourself – include 5 questions from each section. Make these multiple choice in format.**
- C. Following the creation of your practice test, study, take a break and then take your own test.**
- D. Spend extra time on the questions you answered incorrectly.**

**II. The test**

- A. 75% will cover cells, organelles and their function (that is 30 of 40 questions).**
- B. 25% will relate to the systems discussed in the chapter. Study their functions and the way they interact with other systems.**

**III. Sample Activity**

- A. Outline the section covering the Nervous System – we will do this together in class**
  - i. How is a nerve cell different from a blood cell?**
  - ii. How does the nervous system interact with the muscular system?**
- B. Create 3 multiple choice questions.**
